

Symbology, Incorporated

PTI (Produce Traceability Initiative) Labels

Our cost effective pre-printed labels and unique application tools are the right PTI solution for many growers and packagers. Standardized case labels, hybrid pallet labels and count-of-items labels are then affixed by growers/packagers according to standards.

Case Labels

- Variety of accepted label sizes, designs and core sizes
- We'll help determine the correct adhesive for your application
- Labels are pre-printed to reduce the cost of the consumable
- Selection of background colors (red, yellow, white, orange etc.)
- Designed to work with the Symbology custom label applicator (easily applied by hand also)

Hybrid Pallet Labels

- A variety of sizes are available. The SSCC-18 barcode must be at the bottom of the label and the Count-of-Item labels must be stacked horizontally over the SSCC-18
- Multiple adhesives and core sizes
- Typically produced 1, 2 or 4 up for each SSCC-18 label; that may be applied to 1,2 or 4 sides of the pallet
- Selection of background colors (red, yellow, white, orange etc.)

Count-of-Items Labels

- Placed on Hybrid Pallet label, these Count-of-Item labels are stacked vertically over the SSCC-18
- Can be pre printed to reduce cost and simplify application
- Same sizes and colors available as for Case labels
